Fast-moving Flying Objects Over Stalingrad
In Spring 1951

CLASSIFICATION: CONFIDENTIAL

DATE OF REVIEW: Spring 1951

SOURCE:

SOURCE IS UNEVALUATED INFORMATION

[REDACTED]

In the spring of 1951, I was hospitalized for treatment for: allow
[REDACTED] (S 10 2 - 44 28 2). On two occasions during the period of my
convalescence, I, as well as other patients at the hospital, observed
the flight of an unknown object from horizon to horizon, flying from
southeast to northwest. This object appeared to be alighting. I
cannot describe the object, but as I remember, it took approximately
one minute for the object to leave the range of my vision. This
object caused a great amount of vibration in the air and made a
screaming, whistling noise which was different from the noise
made by an artillery shell in flight. I could not see the object
itself, but I did see disturbance in the air which seemed to envelop
it.

Unknown Flying Objects Observed Over Budapest

 This report is based on information received from a confidential source of the
 name of _____

This is UNCLASSIFIED INFORMATION

1. During the early part of May 1956, I was told by several engineers, close associates whom I believe to be reliable, that the Ministry of Defense was alerted concerning the over-flight of a formation of unknown flying objects, flying in an easterly direction during that month.
2. My friends related that what appeared to be aircraft, flying in formation at an extremely high rate of speed at approximately twenty-five thousand meters, were observed by radar units of the Home Air Defense Command. Nothing was done to disturb this flight, the probable reason being that the Home Air Defense Command had no weapons at its disposal to reach these intruders.
3. During the same period, May and June 1956, many reports originating from all sections of Hungary cited the appearance of "Flying Saucers". For two or three weeks, reports appeared almost daily, describing these objects as disc-flying objects which could change direction of flight, acceleration and deceleration with extreme ease. My friends told me of discussions at the War Technical Institute in which Hungary's leading scientists, engineers and technicians took part, concerning these objects. It was decided then, they did not exist and that if anything, the reports were in line with US propaganda. An official announcement appeared in "Szabad Nép" declaring the entire "Flying saucer" case was a myth.
4. An interesting observation of one of my colleagues however, was "Even if they don't exist, I hope they are on their way to South America."
